

FAVOUR OREOLUWA OJO

PRODUCT & SOLUTIONS SPECIALIST

Lagos, Nigeria | +234 808 140 5577 | ojoore35@gmail.com | lloyd-the-dev.vercel.app

I bridge the gap between abstract business needs and high-performance software. With a strong background in full-stack architecture, I design end-to-end workflows that solve real-world challenges with minimal friction. I leverage modern frameworks and automation to move rapidly from concept to launch, ensuring that every product I ship is not only technically sound but purposefully built for growth and scale.

EXPERIENCE

New Horizons Nigeria — Web Developer

March 2026 – Present

- Developed and maintained web applications and digital products across the Education and Digital Marketing teams, contributing to projects for schools, universities, and corporate initiatives.
- Built and delivered major web projects for multiple schools, translating institutional requirements into responsive, functional, and user-focused digital experiences.
- Developed and taught web development programs for students in schools and universities, helping learners build practical skills in modern web technologies.
- Worked on existing websites and digital products, improving performance, usability, responsiveness, SEO, and overall user experience.
- Built new websites and digital products from scratch, gaining extensive hands-on experience with React, Next.js, JavaScript, PostgreSQL, and modern web development workflows.
- Collaborated within a corporate technology environment to understand requirements, develop solutions, troubleshoot issues, and deliver production-ready digital products across multiple projects.

EkondoLife — Technology Intern

July 2025 – Present

- Owned end-to-end product delivery of EkondoLife's digital commerce platform, ensuring performance, reliability, and conversion-focused user flows.
- Led the strategic migration from WordPress to a custom product stack (Next.js, TypeScript, Firebase, Supabase) to improve scalability, speed, and future feature flexibility.
- Designed the information architecture, page flows, and feature logic for the new platform prior to implementation, ensuring business and user needs were met.
- Built multiple campaign landing pages and microsites to support growth, marketing, and internal operations.
- Designed and deployed lead capture & tracking systems, improving visibility into customer journeys and event engagement.
- Architected and managed event ticketing and digital logistics, optimizing user flow from discovery to payment and attendance.
- Provided on-site technical and operational support at company events, ensuring seamless execution between digital and physical experiences.

Allied Computers Ltd, Lagos — Data Analysis Intern

Mar 2024 – Aug 2024

- Designed data systems and reporting workflows for print-usage tracking across multiple client locations, improving cost visibility and decision-making.
- Automated large-scale reporting using advanced Excel formulas and data models, significantly reducing manual work and error rates.
- Built internal web tools that solved real operational problems using React, PHP, and JavaScript, increasing team efficiency and data accessibility.

- Designed and consumed RESTful APIs (Python & PHP) to connect interfaces, data sources, and reporting tools into unified systems.
- Acted as a bridge between operations and technology, translating business problems into technical solutions.

Alpha Beta Consulting LLP, Lagos — *Service Delivery (Tech) Intern*

Aug 2023 – Sep 2023

- Designed user-centric frontend interfaces using React and Tailwind CSS to improve usability and clarity for client-facing tools.
- Contributed to full-stack product features using PHP and JavaScript, supporting complete workflows from UI to database.
- Wrote and optimized MySQL queries and backend scripts to improve performance, reliability, and scalability.
- Worked closely with senior engineers to test, refine, and ship production-ready features.

Side-Hustle Internship — *Frontend Team Lead*

Apr 2022 – May 2022

- Led a team of frontend developers in building multiple product-style capstone applications using React.
- Translated product requirements into clear task breakdowns and UI flows, ensuring efficient execution.
- Strengthened technical communication, leadership, and cross-team collaboration while delivering real projects.

EDUCATION

Trinity University, Yaba, Lagos

2022 – 2025

BSc. Computer Science — CGPA: 4.80 / 5.00

CORE STRENGTHS

- | | |
|--|--|
| ● Product & Systems Thinking | ● MVP & Rapid Prototyping |
| ● Creative Problem Solving | ● Technical Feasibility Analysis |
| ● User Journey & Workflow Design | ● Full-Stack Architecture (Next.js, APIs, Databases) |
| ● AI-Assisted Product Building (Prompt-to-Product) | ● Automation & No-Code / Low-Code Tools |

CERTIFICATIONS

- Frontend Developer Career Path — Scrimba (Jul – Sep 2022)
- Frontend Web Development Ultimate Course — Udemy (Feb – May 2022)
